Sustainable Development Certification

CSR Assessment

Transalliance's CSR Policy

Enhances the environmental performance of road transporters

A company whose aims to be socially responsible rest on three pillars:

Controlling our environmental footprint

Ensuring the company is fully engaged

Developing long-term relationships with stake-holders

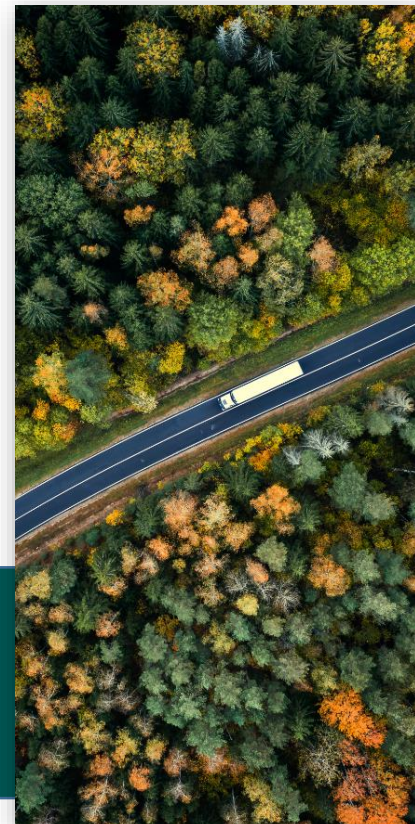

In connection with **Ecoblue**, our solutions help you achieve **your CSR objectives** and improve your positioning on sustainable development through collaborative work between our CSR specialists and yours

- **Economical driving**
- **Optimisation of the transport plan to limit the kilometres traveled empty**
- Use of **combined rail-route transport**
- **Analysis of the solutions**  
(autonomy, route, CO<sub>2</sub>, reduction, reduction of fine particles)  
and selection of vehicles suited to your strategy
- **Reduction of the energy consumption** of your warehouses

## Your **advantages**

Improvement of your carbon footprint  
Access to innovative technologies  
Advice

# Design and consulting

The expertise and the assets of a group well known for its **operational control of transport and logistics**, associated with the **methods and tools of consulting**.

## Your **advantages**

- An independent design office
- Operational and sectoral experience of business managers
- Modelling and benchmarking tools

## Transport

- Optimisation of distribution and collection rounds
- Flow control solution

## Logistics

- Barycentric calculation for optimal location of warehouses
- Design for modification of the building
- Design of logistics solutions
  - Layout and sizing
  - Optimised storage solutions
  - Design of mechanised solutions
- Optimisation of logistics processes

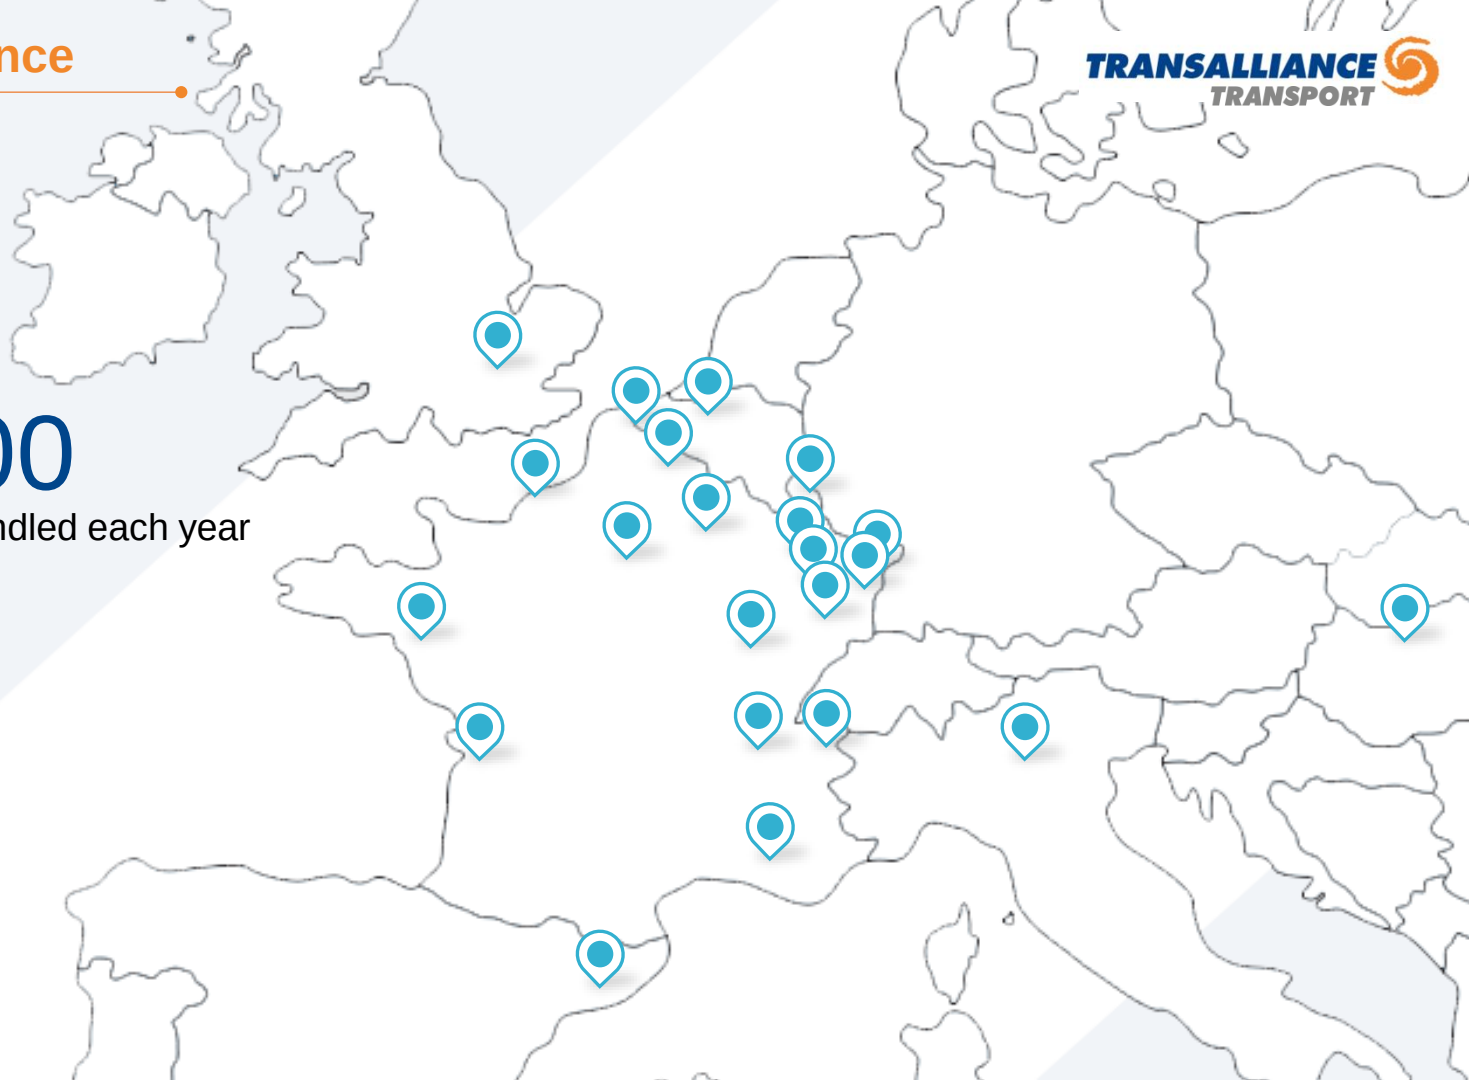

# Transport

## A European presence

1,200,000

transport orders handled each year

# Our transport offer .

## A Transalliance Transport offer for all of your flows:

- Road transport
- Dedicated vehicles with drivers
- Multimodal transport
- B2B Distribution
- Management of your transport flows

### Your **advantages**

- Transport solutions modified to suit your needs
- ISO Certifications
- Premium service
- Traceability
- Design and Consulting

## Transport of your goods in full or partial loads in Europe:

- Packaged or bulk goods
- With an appointment
- Systematic confirmation (pickup / delivery)

## Additional services upon request:

- Management of customs across Europe
- Delivery on Sundays and holidays
- Ad valorem insurance
- Seasonal temperature control
- Centralised invoicing
- Access to a centralised customer service

### Your **advantages**

- 100% Euro VI Fleet
- Adaptation to your safety protocols
- Personalised carbon footprint
- ISO Certification
- Customised services

# Dedicated vehicles with drivers

Dedicated high performance and flexible transport without the constraints of management:

- Vehicles dedicated to your activity
- Operations follow-up

Additional services upon request:

- Vehicles put in your colours
- Temporary provision to respond to the seasonality of your activity
- Creation of a shared structure

## Your **advantages**

- High performance and suitable transport
- Trained and supervised drivers
- Up-to-date fleet
- All-inclusive service
- Customised services

# Multimodal transport

The combination of transport means suitable for you:

- Transport of goods at ambient temperature
- Rail, sea or river transport
- Packaged goods
- Schedule and frequency determined

Additional services upon request:

- Customised swap bodies
- Backup road transport
- Prehensile and on-board trailers

## Your advantages

- Specialised operations centre
- Regular timetables, frequency 6/7d
- Positive environmental impact

## Delivery of your pallets in Europe thanks to the Transadis network :

- Palletised freight of 1 to 6 pallets
- Delivery in 24 to 72 hours or on a given date
- Enhanced visibility thanks to the tracking of events

## Additional services upon request:

- Guaranteed deadlines or special timetables
- Specific type of vehicle or equipment
- Hazardous materials classified as ADR
- Monitoring in real time
- Managing pallets in Europe

### Your **advantages**

- Traceability of operations
- Monitoring performance
- Access to our Customer Service
- Digitalised documents (CMR)
- Security and quality control
- Customised services

# Management of your transport flows

Entrust the daily management of your transport flows to our specialists:

- Transfer of transport orders
- Quota management
- Management of appointments
- Spot purchases
- Organisation of backup

Additional services upon request:

- Management and quality direction of transporters
- Customised dashboards for your transport activity

## Your **advantages**

- Efficient management of your service providers and of your transport plan by our experts
- Customised services

## Computerised data exchange

- Systems are interfaced
- Validation of transport orders
- Dematerialised invoicing

## Transalliance Connect

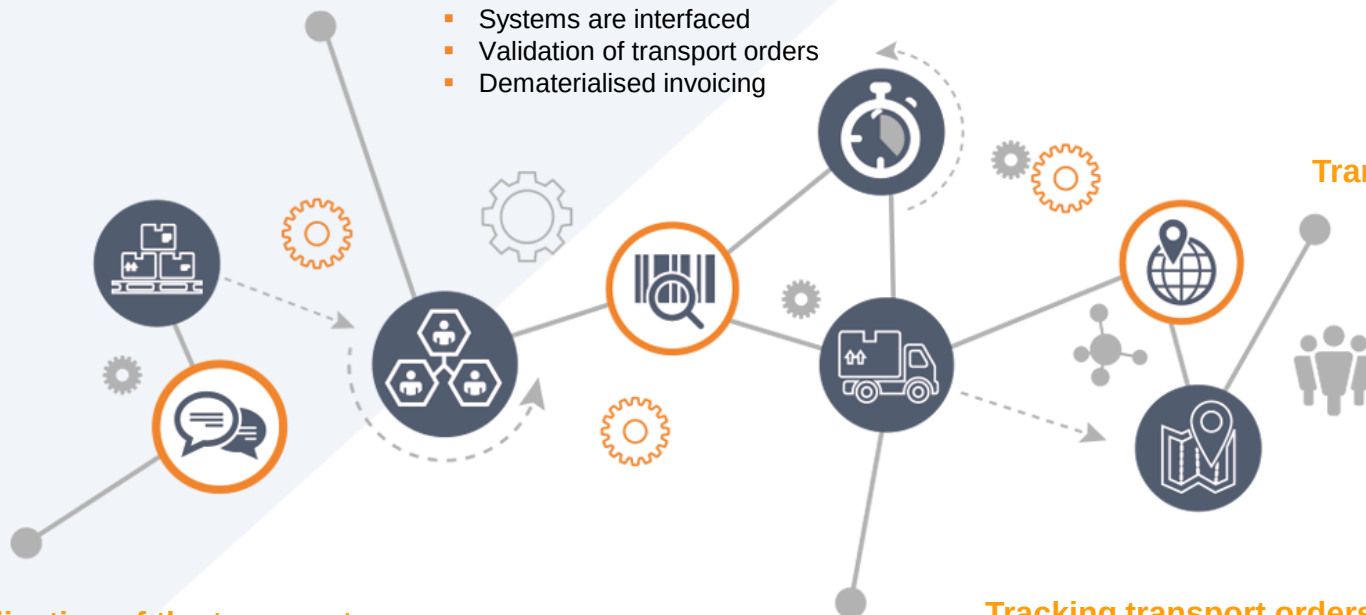

- Analysis of data
- Collaborative tool for real time tracking
- Quality reporting

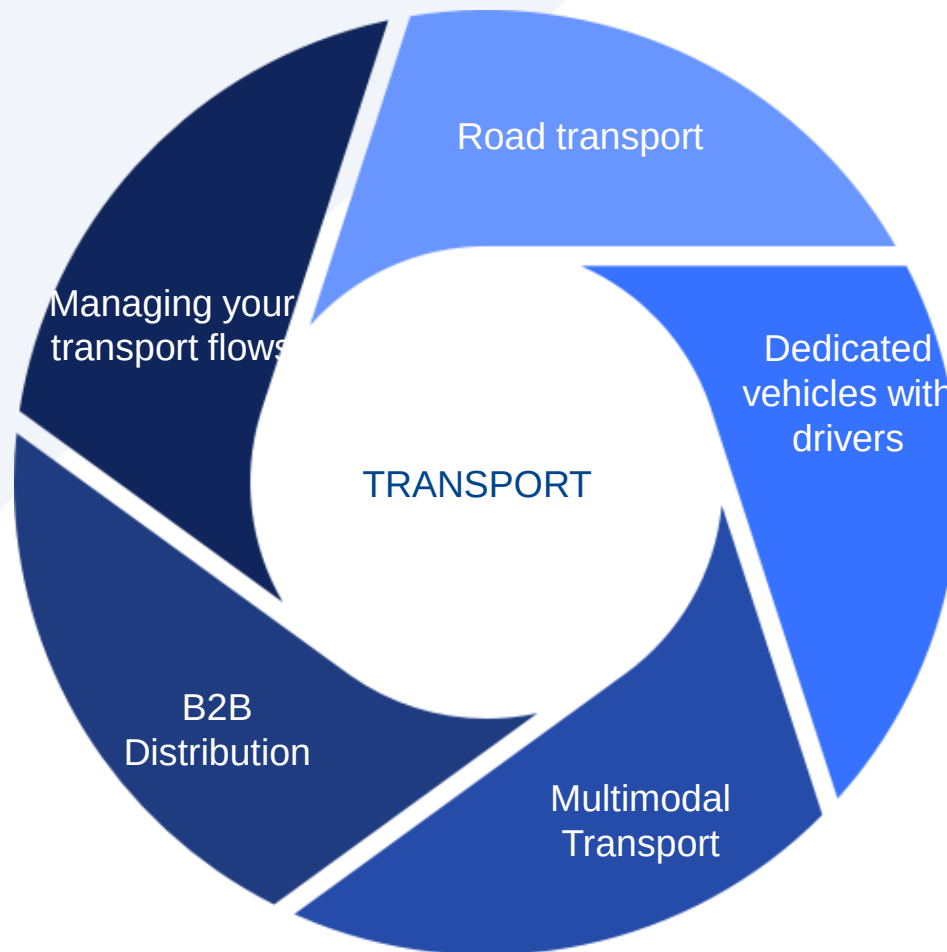

## Digitalisation of the transport process

- Digitised CMR
- eCMR
- Connected vehicles
- Driver communication

## Tracking transport orders

- GPS tracking of vehicles
- Tracking events and notification
- ETA – estimated time of arrival

Logistics order preparations

High performance and optimal management of your logistics activities thanks to our sectoral experts:

- **Industry**  
*An integrated part of your Supply Chain thanks to management in situ or in the warehouse*
- **Automotive**  
*Optimal management of your logistics activities in Lean and just-in-time mode*
- **Mass consumer products**  
*Reliable and flexible management of your Supply Chain while respecting your quality objectives*
- **Retail**  
*Warehousing and distribution solution meeting the needs of your multichannel strategy*

Standard logistics services meeting your needs as closely as possible

## Handling

- Multi-mode supply
- Checking and stocking
- Preparation of orders
- Loading

## Warehousing

- Customised warehousing solutions
- Storage mode: ground/ rack / accu...
- Environment: ambient / negative cold / positive cold

## Co-packing

- Kitting, branding, labelling
- Shrink wrapping, flocking, flaming, covering, filming, bagging
- Packaging in boxes, cases, displays, crating

## Know-how

- EDI
- Reengineering
- Staff takeover
- Safety training
- Real estate solutions
- OEA Warehouses
- Management of ICPE
- Sustainable development

## Management of industrial activities

High valued added specialised logistics services in our warehouses or at your production sites.

- Management of flows (raw materials, components...)
- Line-side supply
- Industrial storage
- Assembly or pre-assembly operations / kitting
- Customised packaging and wrapping

### Your advantages

- Continuous improvement
- Suitable certification EURACRP, ISO, MASE
- Resilience of your logistics business

### Know-how

- Adaptation to flow variations
- Adaptation to changes in range
- Management of industrial environments
- Safe and secure management

## Optimal management of your logistics activity in Lean and just-in-time mode

- Delivery to final assembly line
- Supply to the chains according to flows: Kanban, synchronic
- Industrial implant solution
- Assembly or pre-assembly operations

### Your advantages

- Lean methodology
- Proven quality approach (QRR / QRQC)
- Waste reduction / Increased productivity
- Traceability

### Know-how

- Adaptation to changes in range

# Mass consumption products

Reliable and flexible management of your Supply Chain while respecting your quality objectives

- Multi-mode supply
- Preparation of multi-format orders
- Temperature controlled/ambient storage, positive cold
- Packaging operations

## Your advantages

- Flexible solutions
- Continuous improvement
- Business continuity
- Suitable certification BIO, EURACRP, ISO
- Traceability and control / operational KPIs
- Contract date (DLUO,DLC)

## Know-how

- E-commerce
- FEFO, FIFO
- Management of SSCC
- Management of peaks of activity and seasonal flows

## Warehousing and distribution solution to match your multichannel strategy

- Preparation of retail orders
- Management of returns
- Temperature controlled/ambient storage, negative cold
- Packaging operations

### Your advantages

- Continuous improvement
- Business continuity
- Suitable certification BIO, EURACRP, ISO, MASE
- Traceability and control / operational KPIs

### Know-how

- E-commerce
- Management of peaks of activity
- Adaptation of the buildings

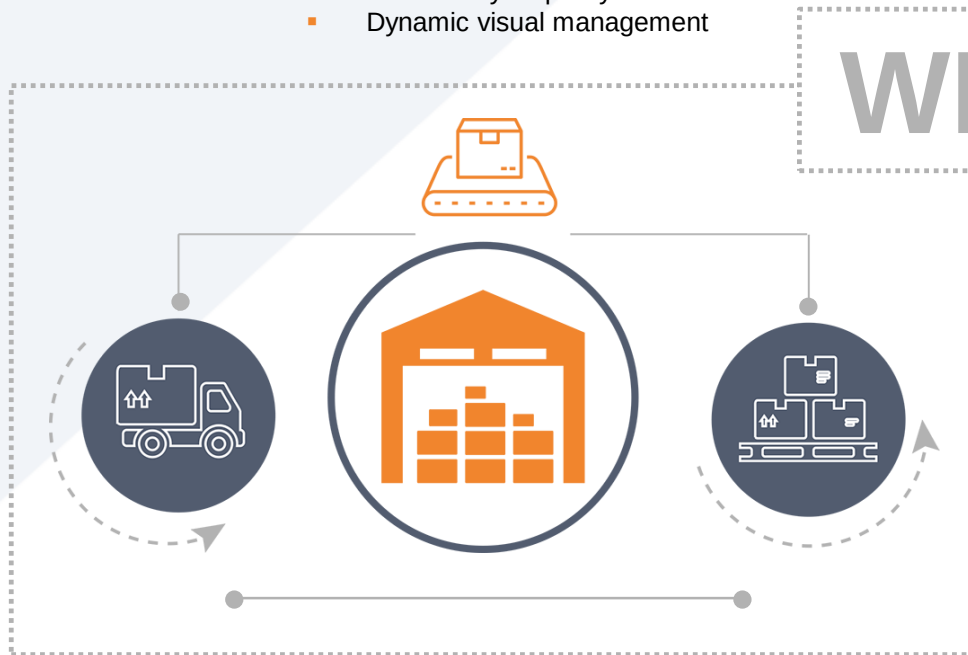

## Real time control screen

- Control of logistics activities
- Productivity & quality
- Dynamic visual management

WMS

## Driver docking stations

- E-CMR
- Digitalisation of the reception
- Estimated hour of arrival

## Control portal

- Multi-faceted HD camera
- Qualitative and quantitative control
- Compliance check

## Automated handling solutions

- Self-propelled mobile robot (camera or LiDAR)
- AGV
- VNA

## Automated warehousing and preparation solutions

- Vertical storage warehouse
- Autostore
- Mobile shelving

Thanks for your  
attention
